

ACCESSAGILITY

Cloud Managed WLAN and WLAN Security

Smart Solution and Unique Wireless Architecture

By leveraging the clients as the infrastructure and a Cloud WLAN Controller the end user can start with a single device architecture and scale to thousands of access points and scanners when needed. This architecture is a great way to add WiFi to an existing area without investing in WLAN equipment.

WLANController.com

WLANController.com has two components, a software client that transforms Windows / Mac OS X / Smart Phones into WiFi "soft access points" and scanners and a web based dashboard that can manage multiple devices from a single graphical user interface.

Pricing and Availability

The WLANController.com solution is subscription service and priced based on the number of active devices that are functioning as access points and scanners. Free trial and pricing details are available at <http://wlancontroller.com>

About AccessAgility

AccessAgility is an information technology (IT) solutions company with offices in the Washington, DC metro area.

Key Features

- ✓ Centralized Wireless Discovery
- ✓ WiFi Visualization and Mapping
- ✓ Soft WIDS Sensors (Windows, Mac, iPhone, iPad)
- ✓ Soft WiFi Access Points (Windows and Mac)
- ✓ Locate Rogue and Interfering Devices
- ✓ Supports 802.11a/b/g/n
- ✓ Device Classification
- ✓ Google Maps Integration
- ✓ Location Tracking
- ✓ Logical Grouping / Topology
- ✓ Security Event Email Alerts

Benefits

- ✓ No Hardware to Buy
- ✓ No Software Licenses
- ✓ Zero Additional Cables to Run
- ✓ Zero Additional Switch Ports Needed
- ✓ WiFi and WIDS for Entire Floor, Building, or Campus in Minutes
- ✓ Dense Access Point and Sensor Coverage Possible
- ✓ Zero Effort Configuration and Changes
- ✓ No Physical or RF Site Surveys Required
